DON'T USE IT ALL UP

Please select the **best** answer.

1. SC.D.2.2.1, SC.G.2.2.1(AA)

Nonrenewable resources were created on earth over a long period of time. These resources are available in limited amount. Once they are used up, they are gone forever. Which of the following is a nonrenewable resource?

- A. Nitrogen
- B. Oil
- C. Pine trees
- D. Water

2. SC.D.2.2.1, SC.G.2.2.1(AA)

Renewable resources can replace themselves. Nonrenewable resources are limited and once they are used up, they cannot be replaced. Which of the following is an example of a renewable resource?

- A. Aluminum
- B. Coal
- C. Forests
- D. Natural gas

3. SC.D.2.2.1, SC.G.2.2.1(AA)

Key West is an island located at the southern tip of Florida. Its only source of fresh water is rainfall and water that is pumped in from the mainland. The larger the population of Key West, the greater the impact on their water supply. Everyone is encouraged to reduce the amount of water that is consumed. Which of the following is NOT a good way to conserve water?

- A. Fix all leaky faucets.
- B. Shorten the time of your shower.
- C. Wait until the dishwasher is fully loaded before turning it on.
- D. Water the entire garden instead of around each plant.
